

GOALTIDE UPSC PRELIMS TEST SERIES 2022-TEST 1 CSAT

Make your way ahead for Mains..!

TITLE : CSAT TEST 1

EXPLANATION AND SOLUTION

Q1)Answer[a]

Passage essentially describes the various ways in which human can be different .The passage tries to tells that human can diverse Creatures .

Q2)Answer [d]

In the above passage

Option a : This is one of the logical inferences but not the **but not** the most significant and practical inference.

Option b – The intensity of dependence of each other **is not** given in passage just held that they are dependent on each other.

Option c- Successful model for reducing carbon footprint is the **out of the context** of the passage.

Option d – This is the most logical inference out of the passage

Q3) Answer [c]

Statement 1 – Human capital development strategy need to be changed as per changing time thus with technological improvement access to technology is necessary for human development.

.Statement 2 – The passage tells that technological changes are impacting the labour market so it can be assumed that relevant transformation in education sector is also required.

Statement 3 –Assumption is correct because author advocates for the focus on investment in human capital which leads to social wellbeing and economic prosperity thus investment in vulnerable labour groups become important

Thus all of the above statements assumed above can hold true.

Q4)Answer[c]

The main idea in the passage despite movements towards political,social,and economical equality expecting a culturally homogeneous society is not possible .Hence both the statement are true .

Q5)Answer[c]

D is the father of A and grandfather of F.so A is the father of F .Thus D and A are two father .C is sister of Fso C is daughter of A .Since there is only one motherit is evident that E wife of A and hence mother of C and F so B is Brother Of A .There are three brothers so F is brother of C.

Q6)Answer [d]

D is the father of A and grandfather of F. so A is the father of F. Thus D and A are two fathers. C is sister of F so C is daughter of A. Since there is only one mother it is evident that E wife of A and hence mother of C and F so B is Brother Of A. There are three brothers so F is brother of C.

Q7) Answer [d]

Statement b is incorrect since both Marx and Weber touch upon the historical aspects of modern capitalism. It is clear from this sentence: "Marx's project is similar to Weber's in that, while he does not devote himself to the historical circumstances which have led to capitalism, he does, like Weber, attempt to understand how modern capitalism has arisen from the capitalism which preceded it."

Statement c is incorrect. It is clearly mentioned, "...capitalism manifested itself in a compulsory, socially rooted system from which NO ONE could escape." Hence, the socially rooted system, as suggested by Weber, was mandatory and not optional in nature.

Statement a is incorrect. The passage says, "Marx's project is SIMILAR to Weber's in that, while he does not devote himself to the historical circumstances which have led to capitalism, he does, like Weber, attempt to understand how modern capitalism has arisen from the capitalism which preceded it." Hence, there are elements of similarity between their work. It does not mean there is no difference.

Statement d is correct. It is clear from the above explanations. Also, the last line of the passage says, "Thus, Marx, like Weber, contextualizes the origins of modern capitalism, delineating the historical process by which capitalism has manifested itself in its contemporary form." Thus, it can be safely concluded that both Marx and Weber concur on the historical antecedents of modern capitalism.

Q8) Answer [a]

Both the statements are mutually contradictory, hence only one of them can be correct. This eliminates option C.

Statement 1 is a valid assumption. The analyses of both Marx and Weber are similar in that both acknowledge the role of historical contexts in the emergence of modern capitalism. Hence, they use the same tool (historical contextualisation) to study a present day phenomenon (modern capitalism).

Statement 2 is an invalid assumption since the passage implies that despite making use of history, there is a difference between the works of Marx and Weber. Difference between their works: Marx does not devote himself to the historical circumstances which have led to capitalism, unlike Weber. Similarity between their works: Both attempt to understand how modern capitalism has arisen from the capitalism which preceded it.

Q9) Answer [a]

By statement 1:

Pawan _ Santosh Ashok

By statement 2:

Amit _ Ashok

By statement 3:

Harshal _ Santosh Ashok

By statements 1 and 2:

Pawan _ Amit Santosh Ashok

Clearly we can see that Harshal will be placed on blank space. Here, we can say that Amit is exactly at the middle of the row.

By statements 2 and 3:

Harshal Amit Santosh Ashok

Clearly we can see that we cannot find the exact place of Pawan. So, we cannot say that who stands exactly at the middle of the row.

By statements 1 and 3:

Pawan Harshal _ Santosh Ashok

Clearly we can see that Amit will be placed on blank space. Hence, Amit is exactly at the middle of the row. But the combination of statements 1 and 3 is not given in the options.

Hence, only option (a) is correct.

Q10) Answer[d]

In the above passage

Option a) In the passage it has been advised that even green growth is not sustainable.

Passage does not talk on diverges between the sustainable growth and inclusive growth.

Option b) In the passage it is not advised that economics should be restricted to human subsistence but one which promotes social welfare as well.

Option c) There is no debate in the passage on one health approach and relations with green growth.

Thus Option d is the crux of the passage which advocates for an economic system which keeps in mind both planetary welfare and social welfare.

Q11) Answer :[b]

Only pair of prime Number with gap of 2

3	5	7
---	---	---

Hence $N^2 - 33 = 3$

$N^2 = 36$

$N = +6, -6$

Hence Only 2 Values Possible

Q12) Answer [d]

Divisibility test

Addition (Sum of all the numbers) must be divisible by 9

$7+1+2+9+2+4+6+5=36$

And $36/9=4$

Completely Divisible

Q13) Answer [b]

Option a- is incorrect. The passage mentions that the destructive power of fire is necessary for the preservation of other ecosystems. Hence, if there is no fire, other ecosystems might be adversely affected. Therefore, frequent forest fires should be regulated, not all forest fires. Option B follows from this analysis. If all forms of forest fires are prevented, it might prevent the development of natural fauna and flora in other ecosystems. This may have disastrous consequences in the long run. Hence, option B is a logical corollary to the above passage.

Option c- is incorrect. This answer option merely restates a fact already mentioned in the passage. It does not make any proposition which the questions demands

Option d- is also incorrect. The very first line of the passage says, "In a rainforest like the Amazon, massive forest fires are a disaster." Hence, it would be incorrect to say that Amazon fires are not disastrous.

Q14) Answer [d]

Statement 1 is an invalid assumption. The passage quotes the case of Amazon which is a rainforest. It would be incorrect to assume that forest fires predominantly occur in rainforests like Amazon. It is probable that other types of forests witness more frequent fires.

Statement 2 is also an invalid assumption. The passage clearly says that within three years of the fire nothing grows in the exhausted soil. Hence, the leftover ash does not help the forest soil address its nutrient deficiency. They might be getting washed away by rain. Though it may be true in some places, it is not a rule.

Q15) Answer [b]

In the above passage

Statement 1 is not a valid assumption because the passage nowhere talks of the Indian model of economic management. We should not assume anything out of the passage.

Statement 2 is a valid assumption because the passage apprehends the lack of even distribution out of the capitalist model so smart economies must focus on creating exchange that create new commonwealth.

Thus only statement 2 is a valid assumption.

Q16) Answer [d]

hot	3
day	5
very	6

Q17) Answer [d]

a is not the most exact and essential corollary as the focus is not on the health of children but overall state of pollution of Delhi from a macro perspective. b describes current situation as per the passage it is not a corollary. c is an exaggerated statement to describe the situation in Delhi. The next step would be control the situation Hence Statement d is right answer.

Q18) Answer [b]

Statement a is only partially correct . Statement b explains the reason why MTP Act needs amendment which is the focus of the passage .c and d are both correct however are not most essential message being conveyed by the passage .

Q19) Answer:[c]

LCM of 4 numbers 24,36,48,64

2	24	36	48	64
3	12	18	24	32
4	4	6	8	32
2	1	6	2	8
3	1	3	1	4
4	1	1	1	4
	1	1	1	1

Now LCM= $2 \times 3 \times 3 \times 2 \times 2 \times 2 \times 4$

=576

And Convert time in Seconds ; 7 hrs 12 minutes

: $7 \times 60 + 12$

: 432 minutes

: 432×60 seconds

Hence :

$$\frac{432 \times 60}{576} = 45$$

576

Note : $45 + 1(\text{Starting Common Rings}) = 46$

Q20)answer[b]

While the passage does state that very few engineering graduates are employable ,it does not assume that it solely on account of poor quality of education .The passage is silent on the reason behind it.

Q21) Answer[c]

The central focus of the passage is on describing the situation of jobless growth , the threats it poses ,the reason for it etc .

Q22)Answer [d]

$S = XYZ + YZX + ZXY$

$(100X + 10Y + 1Z) + (100Y + 10Z + 1X) + (100Z + 10X + 1Y)$

$111X + 111Y + 111Z$

111(X+Y+Z)

Now put any value in X,Y,Z always divisible by 3.

3 X 37 (X+Y+Z)

Now $111=3 \times 37$

And it is divisible by 37

Hence 1 and 3 right 2 is wrong

If we put X=1 Y=2 Z=4

$777/9=86.33$ Not complete divisible by 9

Q23) Answer [a]

Tricks:

10	7	X
11	8	X
12	9	3

$$12^3 - 9^3 = 1728 - 729 = 999$$

$$\text{Hence } 12^2 - 9^2 = 63$$

Q24) Answer [d]

The given word SMART contains 5 letters all are different

$$\text{Hence } 5 \times 4 \times 3 \times 2 \times 1 = 120$$

Q25 Answer [a]

acac/abab/acac/abab/acac

Q26) Answer [d]

Tricks : 11 years

Calendar for the year 2018 will be the same as for the year 2007

Q27) Answer [b]

Always such type of numerical there is **loss**

Short cut Tricks

$$16 \times 16 / 10 \times 10$$

$$256 / 100$$

$$2.56\%$$

Q28) Answer [c]

Q29) Answer [b]

Reasoning Marks 62% of 150=93

Marks obtain by Akshay in all 3 subjects (**Average**) 68% of 150=150x68/100=102

	Maths	Reasoning	English
Marks	116	93	
Deviation from Average	116-102=+14	93-102= -9	14-9= 5

Overall Deviation should be **zero** hence

102-5=97

Q30) Answer [b]

The passage is explaining the ways in which social media has transformed the way we consume news. The focus is on explaining how whatsapp is being used to communicate effectively as well as reach out to a wider audience. Hence b is most correct conclusion. a and d are wrong as they are away from the central theme of the passage. c is not the conclusion but an argument to the central point of the passage.

Q31) Answer [c]

Assumption is an unstated or hidden fact which supports the conclusion or arguments made in the passage.

Statement 1 is also valid. Coevolution is defined as the process of reciprocal evolutionary change that occurs between pairs of species or among groups of species as they interact with one another. And, the passage says "Ecosystems also can be thought of as the interactions among all organisms in a given habitat and may result in ADAPTATIONS for mutual benefit; for instance, relationship of flowering plants and associated pollinators"

Statement 2 is a valid assumption. The first line of the passage says, "An ecosystem is a group of animals and plants living in a specific region and interacting with one another and with their physical environment." Thus, this statement inherently means that an ecosystem is a community within which biotic and abiotic components interact among themselves.

Thus, it can be safely assumed that coevolution occurs in a mutually dependent manner as is evident from the example cited in the above sentence.

Q32[c]

Message of a passage implies the intent of the author behind the passage. It gives a sense of the motive of the author behind writing the passage.

Option a is incorrect. It is only reflecting the definition of an ecosystem evident from the first line of the passage: "An ecosystem is a group of animals and plants living in a specific region and interacting with one another and with their physical environment". It does not cover the broader message being conveyed by the passage.

Option b is also incorrect. This statement may seem to capture the harsh reality given the widespread ecological damage done by anthropogenic factors. However, it is not the message which the author intends to convey through this passage.

Statement c is correct. It most nearly encapsulates the intent of the passage. Last line of the passage says, "An important part of ecosystem management involves finding ways to protect and enhance economic and social well-being while protecting local ecosystems." Hence, there should be harmony among different components of the ecosystem.

Statement d is incorrect. The passage intends to say that the overall well-being of human life lies in the sustainability of the ecosystem as a whole. However, it would be an exaggeration to say that human life cannot be IMAGINED if the demands of ecosystem are ignored. Life may still exist albeit in an unsustainable manner.

Q33) Answer [b]

English + Maths both passed 73%

English pass=80%

Only English Pass=80-73=7%

Maths passed =85%

Only maths passed =85-73=12%

All Passed =7+73+12=92%

Candidates Fail in Both Subject:100-92=8%

Q34) Answer [b]

5 7 2 6 5 7 3 8 3 \square 3 2 5 7 2 \square 3 4 8 2 6 7 8

Q35) Answer [d]

Cotton cannot be grown universally due to geographic requirements .The passage states that cotton is used universally and capitalism has had a role play in that .Rest option useless and out of the context.

Q36)Answer [b]

Option a is incorrect. The passage focussed on supply side aspect of population rise – ensuring food security even in the times of rapid population rise. Population control measures is a demand side aspect which is beyond the scope of this passage.

Option b is correct: The passage cites an IPCC report which says that a shift towards a more plant-based diet is considered a healthy and sustainable dietary option. Hence, this shift in dietary habit can help in combating climate change.

Option c is incorrect. It is mentioned that plant-based diet is a healthy and sustainable dietary option. There is also a need to augment food supplies per unit availability of water. However, it would be incorrect to infer that conservation of water resources can offset the need to shift to plant-based diets.

Option d is Incorrect: The passage recommends a MORE plant-based diet and low meat diets. It would be an exaggeration to say that ONLY plant-based diets should be consumed to prevent climate change.

Q37 Answer [c]

Statement 1 is correct: The passage delineates low meat consumption and more plant-based diets to prevent climate change. It means that the author has assumed that a high animal-based diet results in an increase in release of greenhouse gases in the environment.

Q38)Answer [b]

The terms „big head“ and „fat belly“ refer to the change in this pyramidal pattern.

“Heavy belly” refers to a dramatic increase in the size of the lower middle class, and “big head” refers to rising income inequality.

Q39) Answer [b]

Number of Person =Total salary/Each Person Salary

	Male	Female
Total	6	5
Each	4	3
No of person(cross multiply)	6x3=18	5x4=20
Answer	18	20

Hence $9 \times 2 / 10 \times 2$

=9:10

Q40) Answer [a]

We have $A=B-3$.

$$A+C=2E$$

$$D+5=E$$

$$B+D=A+C=2E$$

Solving all equations we get

$$E=30, D=25, B=35, A=32, C=28$$

Q41) Answer [d]

Option a and b out of the context. Option c is a conclusion not a corollary. D is correct because BAT is a low cost device which can assist the visually impaired people of India

Q42) Answer [c]

The third line (...that seeking such a punishment “would be a regressive step in the field of sentencing and reformation”) of the paragraph clearly indicates that punishment should not be for retribution but to reform the convict. Thus the first assumption is correct. It is evident from the paragraph that the government went against the recommendations of Verma Committee, and awarded death penalty to the convicts. One of the underlying assumptions behind this move is that awarding strict punishments like death penalty would act as a deterrent to such heinous crimes. Hence, statement 2 is also correct. Though the passage states that, “It is a fact that sexual crimes against women have not come down since the Delhi case.” But it is a fact and not an assumption. The assumption being made is that crime rates should go down if stringent punishments are meted out.

Q43) Answer [a]

Add the ratio : $16+9=25$

Out of 25 there are 16 female

hence

$$(16/25) \times 100 = 64\%$$

Q44) Answer [a]

Short cut Tricks

$$81+89 \text{ add unit digit } 1+9=10$$

$$82+.88 \text{ add unit digit } 2+8=10$$

$$83+87 \text{ add unit digit } 3+7=10$$

And so on

Another Trick

$5 \times \text{even} = 0$

Take any even Number :

$$84 \times 85 = \text{unit digit } 0$$

4 x 5 =unit digit 0

Q45)Answers[a]

$$4^2+2^2+1^2=21$$

$$5^2+3^2+8^2=98$$

$$6^2+7^2+ 3^2=94$$

$$(36+49+9)=\mathbf{94}$$

Q46)Answer [c]

Option b is an umbrella statement which can not be concluded .In the field of technology they share a symbiotic relationship and are thus partner in the field of technology.

Q47) Answer [b]

Required ways : ${}^{14}C_{11}$

$$(14 \times 13 \times 12) / (1 \times 2 \times 3)$$

Answer: 364

Q48)Answer [b]

Marks of first 7 paper : $7 \times 42 = 294$

Marks of last 7 paper : $35 \times 7 = 245$

Addition of these Marks $(294 + 245) = 539$

Marks of 13 paper: $13 \times 40 = 520$

Marks in the seventh paper: $539 - 520 = 19$

Q49)Answer [d]

2	$2 \times 2 = 4$	$4 \times 3 = 12$	$12 \times 4 = 48$
A (2 gap)	D(2 gap)	G(2gap)	J (H,I 2gap)
13 (+4)	17 (+6)	23	

Q50) Answer [d]

Hint : first find two numbers

a:12 and b:2

Hence $a \times b = 12 \times 2 = 24$

Q51)Answer [c]

Hence Original Price of saree :

$$3060 \times 100 / 85 = 3600/-$$

And now 20% profit seller wants

$$3600 \times 120 / 100 = 4320/-$$

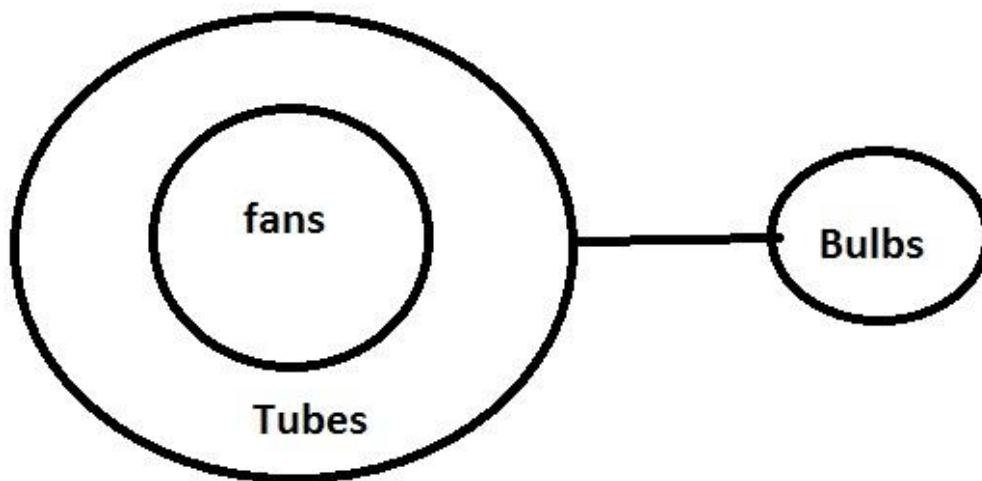

Q52) Answer [c]

b is wrong as the passage never states that native people were ignorant about their history .Statement d out of the context . Statement a is partially correct when it says history was manipulated However the myth of benevolent despotism is extra from what it being talked about in the passage

Q53) Answer [d]

	Milk	Water	Milk +water	Make them equal	New Milk	New Water
First vessel	7	8	15	$15 \times 6 = 90$	$7 \times 6 = 42$	$8 \times 6 = 48$
Second Vessel	13	5	18	$18 \times 5 = 90$	$13 \times 5 = 65$	$5 \times 5 = 25$
					$42 + 65 = 107$	$48 + 25 = 73$
					107	73

Q54) Answers:[a]

- (A) Fans are not bulbs → True (Fans are tubes and tubes are not bulb this implies fans are not blub)
- (B) All tubes are fans → False (This can be possible but not denfinite)
- (C) Fans are bulbs → False (It is definitely false as Fans are tubes and tubes are not bulb this implies fans are not blub)
- (D) No tube is bulb → True (It is clearly given statements)

Hence, only **(A) and (D) are true.**

Q55) Answer [c]

In the Above passage

Option a)– it effective bans are there it cannot enter into the same nation again so option D is incorrect.

Option b)– Although there are concerns that waste can move to various places but there is no talk on the making global binding laws to control them. Thus option B is not correct.

Option c) is correct because the feature of waste to move from one place to other through various medium has been discussed in the passage.

Option d) – If is nowhere suggested by the author to decentralize the waste management as strategy for better waste management.

Q56) Answer [a]

In the above passage

Option a holds correct **because author advocate for replanting the trees in the Long term when it is sustainable and balance the sequestered carbon**

Option b is incorrect because there is no talk on developed and developing countries in the passage so it is out of the context of the passage.

Option c - The passage is against replanting the forest in the short term because of issues like carbon sequestration.

Q57) Answer [a]

Statement 1 valid assumption because advocates that rather than replantation we should try to reduce gas emissions at source only through changing consumption pattern and increased efficiency.

Statement 2 is incorrect because passage the author nowhere talks about the Indian laws and regulations. So assuming outside the passage is wrong assumption.

Q58) Answer [a]

In the above passage

Statement 1 is true because author talks of the investment on health so increasing access to contraception can be one method of it.

Statement 2 is also correct because making women community leaders have direct implication on the food security because of the large number of women employee in the agriculture sector.

Statement 3 is not correct because passage does not talk of government of India schemes which is out of the context of the passage.

Thus only statement 1 and 2 can be the most practical implications.

Q59) Answer [c]

In the above passage

Factors that can be considered by policy makers are

Statement 1 is true because rural roads are directly linked to food production and supply thus food security.

Statement 2 is not directly related to food security because cotton is cash crop which have no implication on food security directly .

Statement 3 is true because cold storage chains are one measure component of food security. Statement 4 -Marketing of agri export have very little direct implication on the food security of nation .Thus policy makers can avoid it.

Q60)Answer [d]

Option a is wrong as #MeToo movement may have changed the attitude - now the wrong doings have greater chance of being exposed. The passage also mentions about male employees being fired based on the allegations made by their female colleagues. Hence, the movement is a step in the direction of improving the conditions of workplace.

Option b is incorrect. It would be an exaggeration to say that sexual harassment at workplace would cease to exist after the #MeToo movement. Yes, there probably would be reduction in such cases after widespread exposure by females around the globe.

Option c can be correct. The silence on the part of victims of sexual harassment might have presented workplace in a positive light. The exposure by victims might change this perception of the workplace. However, the passage does not talk about the general perception of workplace in pre-“#MeToo” world. It is probable that the workplaces were infamous for some other reasons. Let’s put this option on hold.

Option d can also be correct. **#MeToo movement encouraged many women to come forward and narrate their ordeal. This will give a moral boost to other sections of victims who might have faced ordeal or harassment of some other kind. Hence, this answer option sounds more appropriate.**

Q61)Answer (d)

Statement 1 is incorrect. What goes on in the minds of the accused is beyond the scope of this passage. The passage restricts its domain to brief elaboration (with historical context) of #MeToo movement, and its consequences.

Statement 2 can be a corollary to the given passage. It is not an assumption.

Q62)Answer [d]

OPPOSITE PAIRS

2	4
1	6
5	3

Hence answer (d)

Q63) Answer [a]

A	72	8x5	72x5=360	Now
A+B	40	8x9	40x9=360	
B		Note: right diagonally opposite		360/4=90
B	90	Take difference:9-5= 4		B alone require 90 days

Q64) Answer [a]

Q65) Answer [b]

A	Positive (fill)	16	$16 \times 3 = 48$ (+3)	$A = 3 \times 30 = 90$	
B (negative)	Negative (empty)	24	$24 \times 2 = 48$ (-2)	B = $90 - 48 = 42/2$	
				B = 21 minutes	

Q66) Answer [c]

The above passage talks about the inter linkage between political power social capital and human capital. So

Statement 1 which held that social capital influence human capital also holds true because of inter linkage among all of them.

.Statement 2 which held that human capital influences social capital holds true

Thus both are correct.

Q67) Answer [c]

In the above passage

Statement 1 is true because passage upper class parents can afford even the private schools which is exclusive to them and public schools are open to all so they are not excluded from there thus the argument is true with respect to passage

Statement 2 is also true because explain the privileges available to the affluent section of the society which also includes the privileges mentioned in the options

Q68) Answer [b]

He walk 8 km in 1 hour

Means 4 km In 30 minutes

2 km in 15 minutes

Hence 6 km in :30+15=**45 minutes**

But he take after every kilometer 4 minutes

In 6 km journey he rest 5 times

$5 \times 4 = 20$ **minutes**

Hence Total Time he takes :**45+20=65 Minutes**

Q69)Answer[b]

In the above passage

Option a is not a significant corollary because passage nowhere suggest to calculate the global footprint rather it suggest for precautionary and regulatory measures

Statement 2 is valid assumption because

Option b - is most significant corollary because the passage suggest for the precautionary regulative measure.

Option c is correct with respect to general environmental concepts but in the passage it cannot be most significant corollary.

Option d - Passage does not focus on the 4th industrial revolution rather it focuses on other regulatory need to reduce the damage to environment

Q70)Answer[c]

The environmental realm is defined by the harm that is not irreversible, as per this passage.

Thus for policy makers, it is very different from other areas which can be revisited and

Reversed Since environmental damage is not reversible, we should foresee the harms and prevent it,

Thus both the assumptions are valid and flows logically and practically from the passage.

Q71)Answer [d]

In the above passage

Statement 1 is neither suggested in the passage nor direct inference which can be derived so it cannot be a policy implication.

Statement 2 which talks of coal mining regulation is out of the context of the passage.

Neither 1 nor 2 statements are explicitly mentioned.

Q72)Answer[c]

Add length of train and length of bridge get total distance:350+250=600 meter

Time 20 seconds

Hence speed=distance/time

600/20

=30m/s

Note :But they ask in km/hr

Hence $30 \times \frac{18}{5} = 108 \text{ km/hr}$

Note: 1 (m/s)= 18/5 (km/hr)

Q73) Answer [c] The statement mentions that the world for man is as he makes it himself .So some people might find it good and some quite bad .Thus both I and II follows .

Q74) Answer [b]

Number of boys who passed

$$15+1+28=44$$

Total Number of boys in the class: $44+6+5= 55$

Q75) Answer [b]

Ashok/Vikrant=600/540

Ashok /Vikrant=10/9

Vikrant/Ajay=500/475

$$=20/19$$

Now equal ratio:

Ashok	Vikrant	Ajay
10x20	9x20	19x9
200	180	171

Hence Ashok-Ajay=200-171=29 meter

For 200 meter 29 meter

(200x2) =400 meter and 29x2=58 meter

And for 400 meter **58 meter**

Q76) Answer [b]

Passage talks about lost potential of the internet due to human actions statement 1 is absolutist statement .

Q77)Answer [a]

In the above passage

Option a is most significant implication because it is broader option which includes both citizen and non citizen within its border.

Option b is not crux of the passage because it is narrow aspect of the passage which calls for protection only of citizens and excludes non citizens.

Option c is incorrect because nation can. protect its citizens even outside the border.

Option d is incorrect because nation can also protect non citizens within its border

Q78) Answer[a]

In the above passage

Statement 1 is correct because citizenship is a kind of privilege which also guarantees human right protections and it is also upheld by the passage

Statement 2 is incorrect because even in democracies monopoly on violence lies with the nation state.

Thus 1 alone is correct and a is answer

Q79) Answer[a]

The **passage talks about futility of targeted killings through drone strikes which is proving to be of no use to anyone .**

Q80) Answer [a]

Two digits prime Numbers :

Note : There are **25** prime numbers between 0 to 100

Two digit prime numbers are following :

11,**13,17**,19,23,29,**31,37**,41,43,47,53,59,61,67,**71,73,79**,83,89,**97**

In that **Bold** Prime Numbers and also prime Number when reversing it

We have to find **sum** of these Numbers

Hence adding all these :13+17+31+37+71+73+79+97

=418
